Lancaster Farming

Vol. III. No. 13. Quarryville (Lancaster County) Pa., Friday, Feb. 7, 1958 $2 Per Year

SAFETY WITH EQUIPMENT actually begins before the machinery is in the field. Most non-fatal farm accidents involving machinery happen because the machine was not stopped when being repaired or adjusted. Many field adjustments or repairs next summer can be avoided by getting equipment into good running order now. Shown here are Jake Kauffman, Quarryvile, and Elwood Ammerman, Drumore, overhauling a tractor in a dealer's shop. (LF Photo)

Tobacco Co-op Believes Controls Will Raise Price

Acreage controls, long condemned in Lancaster County, were hailed as a possible solution to dropping tobacco prices by the Lancaster County Tobacco Growers Cooperative Assn at a meeting Friday night

Members of the cooperatve association felt that an oversupply of leaf is causing current price slump and that controlled production is the best solution.

In the business session, acting manager of the cooperative, Mark S Hess, R6 Lancaster, resigned both as manager and as a director Hess said that his positon as manager of the feed operations of the Pennsylvana Farm Bureau Cooperative make it impossible to give the cooperative jobs the time and effort required

He has been acting manager since 1950

Harry Hershey, R1 Marietta, Jacob Stahman, R6 Lancaster, Arthur Reist, 1050 Eden Road, Lancaster- and Cyrus Neff, R2 Lancaster, were named as directors from the northwest, southern and north eastern districts of the cooperative with Neff being named to fill Hess' unexpired term.

Also discussed by the growers was the possibility of establishing a tobacco auction It was felt that this would give more competitive bidding for the tobacco

However it was pointed out that buyers now do not buy until they are ready Questioned the value of holding an auction when nothing required the buyers to appear on the auction floor

Cooperative president Harry Hershey said, "Only when we have enough cooperators willing to give us their tobacco, so much that the buyers have to have some of it, will we be able to have an effect on the market We must have loyal, cooperative members

Getting out of the realm of marketing and into production, presumably to grow more tobacco in case acreages are cut, the group passed a resolution asking Penn State for new tobacco fertilization recommendations in light of present soil tests

SCD Board Get Certificates From Goodyear

Seven members of the Lancaster County Coil Conservation District board of directors were awarded Certificates of Merit for their work in soil conservation at a meeting Monday night in Lancaster

Presenting the certificates was Robert Dickey field representative of the Goodyear Tire and Rubber Co., Dayton, Ohio Last fall the District was given the Goodyear trophy as the top conservation district in the Commonwealth

Receiving certificates were Chairman Amos H Funk, R1 Millersville, vice chairman, Henry H Hackman, R2 Manheim, secretary-treasurer, Wayne B Rentschler, Lampeter, commission member, Charles H Pearce, 11 Edgehill Dr, Lancaster, farmer member, Elmer V Good, R3 Lititz, and farmer member Elmer M Sensenig, R1 New Holand. Andrew H Hackman, R2 Manheim, was the conservaton farmer of the year in the county

Work unit conservationist W Martin Muth, Lititz, reported to the board that 18 cooperators in the district have accepted an offer made by the Glatfelter Pulp Wood Co, Gettysburg, to furnish tree seedlings

A total of 24,900 trees have been ordered for planting this spring The only restriction made by the firm is that the free trees are to be distributed only to cooperators in soil conservation and that the trees be planted under the supervision of the work unit and woodlot conservationists

Muth said that the numbers are varieties ordered are as follows White Spruce, 7,550; White Pine, 11,300, Hemlock, 1,000; and Bank's Pine, 1,500

The state Game Commission also has made trees and shrubbery plants available to organized groups. These are surplus seedlings not needed in the Farm-Game Land program

The 385,650 plants available will be distributed in the 13-county areas of southeastern Pennsylvania. Application for the seedlings must be made before Feb. 24.

New Assistant Agent Serving In Chester Co.

Frank E Bortz, R1 Shelocta, has been named to the Agrictural-Extension Staff of Pennsylvania State University as an Assistant County Agent and will be stationed in Chester County He will be a member of the extension staff headed by County Agent Robert A Powers, Jr

His appointment, effective Feb 1, was announced by Dr H. R Albrecht, Director of Agricultural and Home Economics Extension at the University

Bortz replaces H Wallace Cook, Jr, who resigned last Dec 15 to return to operate the home dairy farm in New Castle County, Delaware

Young Farmers Meeting Feb. 8 At Manheim

Saturday will see the first meeting of the Pennsylvania Young Farmers at the Manheim Central High School The executive committee will meet at 10 30 a m.

The general meeting will be held in the afternoon Highlight of this meeting will be a slide show of conditions in Iran presented by George Derr, chef of agricultural education in the state department of public instruction

Derr was former agricultural ambassador to Iran

According to J J Oberholtzer, R1 Bird-in-Hand, public relations officer of the state organization, the young farmers plan a meeting in each of the six districts of the state. Lancaster county is in Region 2, the southeastern part of the state

1957 Broiler Production Jumps by 8 Per Cent

During 1957 commercial broiler production in the 22 important broiler-producing states totaled 1,295 million birds, up eight per cent from 1956 and the largest number of record for these states

Georgia, with a tally of 261 million buds in 1957, produced over twice as many as any other state Runners up were Arkansas with 110 million, North Carolina with 105 million, Alabama with 102 million and Texas with 101 million

Lower Milk, Egg Prices Drop State Farm Income 3 Per Cent

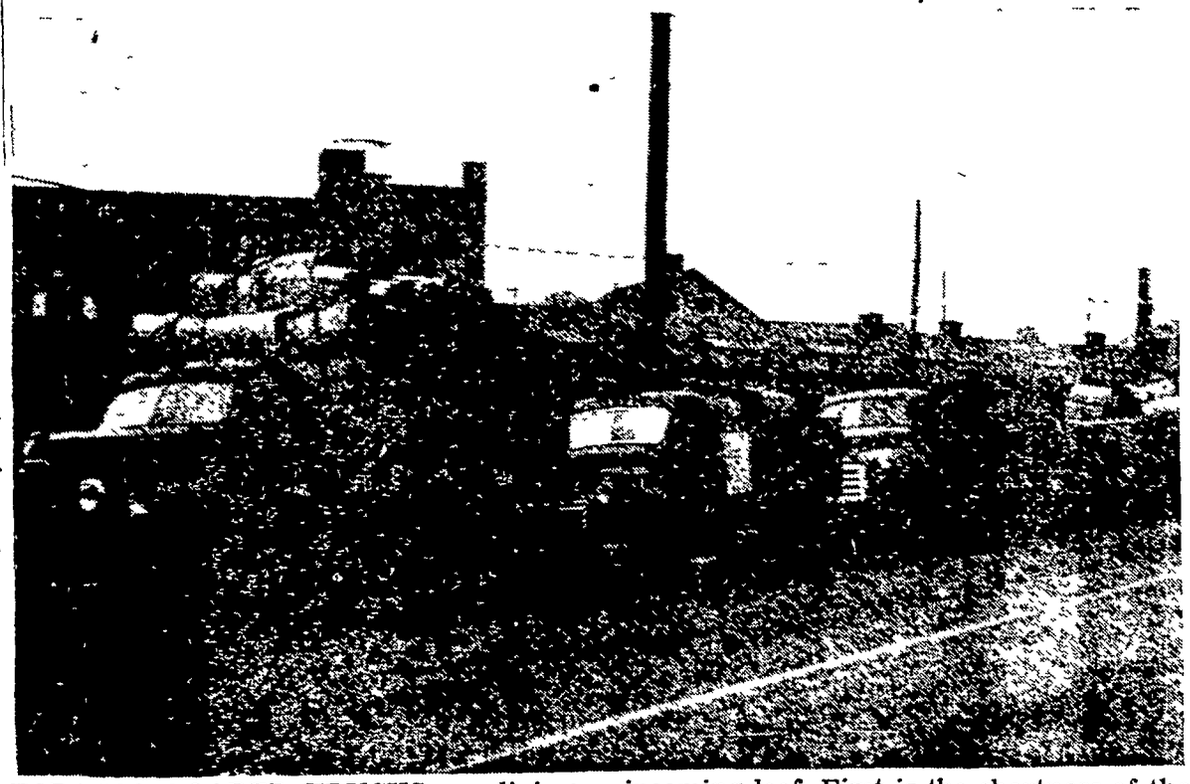
Lower milk and egg prices in mid-January dropped the average Pennsylvania farm income for products three per cent from a month ago, the State Department of Agriculture said today

According to the Pennsylvania Crop Reporting Service farmers received 20 cents less for 100 pounds of milk last month than in December 1957 and eggs were five and a half cents a dozen below a month ago.

IN ADDITION to lower prices for milk and eggs, decreases were noted for hay, butterfat, tobacco and wool, and offset gains for meat animals, poultry and other crops

The prices received index for mid-January stood at 254 per cent of the 1910-14 base level and compared with 262 per cent for the month ended Dec 15, 1957. Nationally, the price index was 247 per cent in mid-January against 242 per cent a month earlier

THE MOST APPRECIABLE gain in prices received by Pennsylvania farmers in mid-January was for meat animals as calves showed a $1 increase and hogs and beef cattle averaged 50 cents more for 100 pounds.



TOBACCO LOADED TRUCKS are lining the streets adjacent to warehouses as the 1957 crop moves to market. Two things are noticable this year when looking at the incoming leaf. First is the shortness of the bales as compared with other years and the other is that bales are being made much tighter. (LF Photo)

Broiler Prices Weaken in Response To Buyer Resistance in Stores

LANCASTER — Broiler prices weakened slightly from the higher prices of the last few weeks at the Lancaster Poultry Exchange's Jan 30 auction

Such a downward trend has been expected by local buyers who called the higher prices an unreal market Another factor in the decline is the fact that high priced broilers are now moving into store and are meeting consumer resistance

Broilers averaged 20 86 cents with 100,275 being sold at the recent sale The price range was from 19 to 21¼ cents One lot of 500 broilers topped the sale at 24 cents capettes 3 200 in all sold from 25¼ to 26½ cents a lot of 400 heavy fowl moved at 21 cents and 950 Leghorn fowl moved at 15¾ and 16 cents

Here is the Jan 3 sale by lot number, seller with grower in parenthesis, number and breed, age in weeks and days buyer and price per pound

1 Wengers (Clair Hilsher) 975 Indian Rivers 9 6 no sale 19 cents bid 2 N Park Miller 350 White Vantress cockerel capettes, 13 2 Walter B Lehman, 26½ cents 3 Levi M Weaver, 400 Leghorn yearling fowl, Roy E Ream, 15 cents 4 Ephraim M Heinley, 400 Silver Cross fowl, Walter B Lehman, 21 4 cents 5 Glenn H Herr 1400 White Vantress pullet capettes 17, no sale, 25 cents bid

6. **Daniel G. Forry** (Elmer), 5 900 White Vantress 10 2, Daniel K Good, 21 cents 7 Forry (Elmer) 800 White Vantress, 10 2, John E Rettinger, 24 cents 8. Forry (Elmer), 4 000 White Vantress 9 6, S E Davis, 21½ cents 9 Elmer H Rohrer, 6 000 White Vantress, 9 3 College Hill Poultry, 21½ cents 10 Enos Buckwalter 6,000 White Vantress and White Rock 11 no sale 20 cents bid

NEW EFFECTIVE WAY TO CONTROL WORM PARASITES IN SWINE . . .

'HYGROMIX'

now available in

RED ROSE®

HOG FEEDS

'Hygromix" is a new antibiotic that provides growth stimulation and effective control of intestinal worms in swine The control of worms is accomplished by the prevention of worms reduction in worm egg production and controlling immature forms before they do their damage The main job of "Hygromix" is to keep costly worm damage from happening

So—to effectively control worms in swine—feed any of these feeds containing Hygromix Red Rose Hog Meal, Red Rose Pig Starter Pellets, or Red Rose Pig & Sow Meal Nothing else is required . . no starving no limiting of feed, no isolation, no special mixing The results — pigs put on more weight, faster and get to market sooner

TRY RED ROSE HOG FEEDS with "Hygromix"—now!

ALL-CROP drill

Each seed has a better chance of growing — and producing — when planted with an ALL-CROP drill.

The tractor-mounted ALL-CROP drill offers speed, accuracy and convenience . . . for drilling grain, sowing seed and spreading fertilizer.

- Seed and fertilizer placed in separate bands for protection against "burning."
- Micro-Feed metering provides exact amount of seed per acre.
- Force-Flo placement assures exact amount of fertilizer application.
- Hydraulically raised and lowered . . . built for fast drilling . . . fully mounted on D-14, WD-45, WD and CA Tractors.

ALL-CROP is an Allis Chalmers trademark.

Tobacco Co-operative Plans Sound Good, But How Will They Work in Practice?

COUNTY TOBACCO GROWERS, members of the County Tobacco Cooperative, Friday night took a stand that acreage should be cut and that perhaps a tobacco auction should be started in the County.

Neither of these ideas is new. As a matter of record, both have been given an opportunity in the County. Neither seemed to work too well. Although, to be more exact, the acreage cutting business was taken up in a federal referendum calling for government control of acreage. This was defeated by a large vote.

The tobacco auction did function for a while with fairly good results. But due to a number of factors it died.

Perhaps the biggest reason it died is that farmers were quite willing to sell by the average set at the auction, but are unwilling to show themselves at the auction to sell a crop.

Two very good examples of this attitude are at the Lancaster Poultry Exchange and the Eastern Shore Poultry Grower's Exchange in the Delmarva area. These two auctions have stopped giving the sale averages on the day of the sale. So many broilers were being sold on the average that listings were getting too small to give a true average price for broiler chickens.

The same is true for any terminal market. For a true price for any given commodity to be established, there must be enough volume at the market to make a price If the price is not made in a true supply and demand situation, you can be sure that the buyers will be quick to establish the price that best suits them.

That is the problem that faces the tobacco cooperative if they decide to start an auction They must have enough guaranteed volume on a year in-year out basis to make a true market. From the history available, it appears doubtful that this could be accomplished.

And as for cutting tobacco acreage, that is just exactly what should be done if you believe in the supply and demand formula of the economists. Lower the supply, the demand stays the same, and prices will rise. It looks real good—on paper.

But in actual practice what happens?

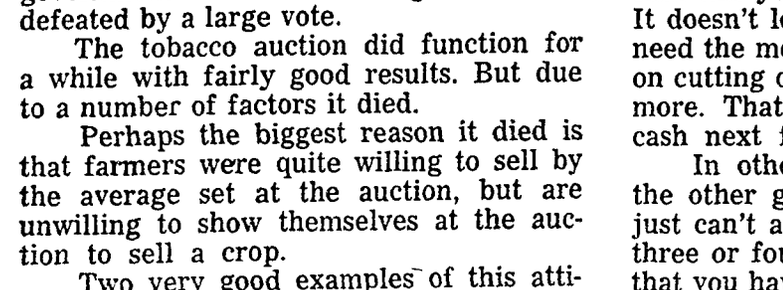
Well, the tobacco check was pretty slim this year. We need a little more cash. It doesn't look like the price will rise. We need the money too much to take a chance on cutting our acres, so we'll plant an acre more. That should give us a little more cash next fall.

In other words, it's a good idea for the other guy to cut his acreage, but we just can't afford to. Multiply this by some three or four thonsand farms and you see that you have more tobacco than you know what to do with.

Actually tobacco acreage could be allowed to rise a little each year. Cigar consumption rises a little each year. But the manufacturers are learning to cut their use of leaf in the manufacturing processes just about as fast as the consumption rises. So the average farmer almost never is able to notice any difference.

So to sum up, we think that the members of the co-operative have an excellent idea, both by the book and in practice But we believe that they do not, at this time, have the tight organization and control of their members that will be required to make either plan work.

The plans can be worked, but it will require a tremendous education of the tobacco farmers and a drastic change in the marketing habits of the area.



BY JACK REICHARD

75 Years Ago

August Hechler, a farmer living near Reading, Pa, suddenly disappeared from his home A few days later it was reported that the missing man was seen in Lebanon and Harrisburg. His wife refused to believe these reports, stating that every night she had a premonition that her husband's body was at the bottom of a neighborhood abondoned mine She insisted that the deserted mine be searched. A number of neighbors agreed to make a search, and to their amazement found Hechler's body at the bottom of a 60-foot shaft in 15 feet of water, with a 20-pound stone fastened about his neck The Coroner's jury returned a verdict of suicide

PASTOR'S WIDOW COMMITS SUICIDE

At Bridgeport, Ala, Mrs Wheeler, widow of the Rev J H Wheeler, went to an orchard climbed a suitable limb of an apple tree and pruned off its branches She then dressed in her best clothing and carefully arranged her hair Being unable to find a rope, she made one out of colored yarn

This she securely tied to the limb of the tree, formed a noose at one end, and encircling it about her neck sprang forward She dropped about five feet and died of strangulation Five children were left to survive

William Strickler, one of the wealthest men in Clark County Indiana, in 1883, deeded a farm to each of his six children The smallest farm was valued at $11,000 the largest at over $20,000 Strickler explained he did not want his will contested after his death, and desired to see all his children satisfied before he died.

Seventy-five years ago there was only one nickel mine in operation in the United States. It was located in southern Lancaster County, Pa The mine was some 200 feet deep and had been worked for 17 years. At that time the refined product was worth $3 per pound.

UNITED STATES PAYS CHEROKEE INDIANS CLAIM

Back in 1883 Secretary of the Treasurer Teller paid to Chief Bushyhead, of the Cherokee Indians, $300,000 appropriated by Congress for lands ceded to the United States by the Cherokee Nation. The money was to be distributed among Cherokees and their decendants then living, in accordance with the decision of the Cherokee Council.

50 Years Ago

Back in 1908 a Western farm family came near being exterminated because of a keg of liquor kept in the barn.

Five sons living at home, primed up to the hilt with booze drunk during the night, were told to milk the cows that morning One of the boys pushed the cow he was milking against another next to him and knocked a brother off his perch. Starting with milk stools, the conflict spread until all were involved and pitchforks, shovels and pocket knives were brought into play

The parents attempting to quell the disturbance, were nearly killed

Finally neighbors phoned in a riot call to the nearby town, and peace officers soon appeared on the scene and stopped the fight Two of the boys were slashed and cut so severly that they all but bled to death, while the father some 80 years of age, suffered a broken hip Every member of the family, including the aged mother, required medical treatment for cuts and bruises.

As a matter of record, the dispatch stated that the children never had any educational advantages, nor had they ever attended the nearby church

CORN MOULD ALARMS PENNSYLVANIA FARMERS

Pennsylvania farmers in general were greatly alarmed over the condition of their 1907 corn crop The crop in many sections o fthe state, which had been cut before fully ripened, became mouldy and the death of a number of valuable farm animals resulted through its use as feed

Veterinarians, who had been consulted on the matter, advised the destruction of the corn as soon as the mould appeared The mould started in the center of the cob making it soft and mushy, soon affecting the whole ear The fodder was similiarly affected and equally harmful when used as feed, according to the veterinarians

* * *

Landisville, Lancaster County Pa, held the honor of having the finest suburban street car station in the United States, a half century ago. It was constructed entirely of glass, iron and concrete. The roof and spouting, all in one piece, was made of corrugated iron The station was built pointly by the street car company and private contributions raised through the efforts of the late Simon B. Minnich

25 Years Ago

Emphatic opposition was voiced by J Borton Weeks, president of the Keystone Automobile Club, to a plan advanced by George C Talbot, Speaker of the House of Representatives, to scrap Pennsylvania's construction program and divert the Motor Fund to the counties for unemployment relief.

Weeks pointed out that in 1932 90 per cent of every dollar unused in the construction and maintenance of Pennsylvania highways and bridges went for labor, either in actual construction and maintenance of the project, or in the manufacture and transportation of the materials To divert any portion of these funds would mean that thousands of workmen would be thrown out of employment, he added.

He said it was on this theory that the Federal Government in its 1933 public program, had recognized work as one of the most effective and economical means of creating employment relieving distress, and at the same time obtaining an adequate return for the public's dollar.

Daring To Teach

Lesson for February 9, 1958

TEACHING is not always a drab matter of pounding facts into people's heads It can be something much more exciting than spinning fine theories which only a few "egg-heads" can understand. Teaching can be dramatic; it can even be daring It can be met not only with sleepy indifference but with stones, rotten eggs or worse This is true of the teaching of the church Admitted, what the church sometimes passes off for "teaching" is dull stuff. There are churches where what is taught seems to make no difference whatever to the people who hear it. There are churches where the preacher or teacher seems to have joined the politician in singing the praises of home, peace and mother, amen.

Dr. Foreman

How It Was With Jesus

Teaching can get people into trouble. Jesus himself went to the cross because of his teachings The mobs that nearly lynched him on more than one occasion were stirred by his teaching Whether people were angered or not, they were always impressed, — astonished, Matthew says. Yet he dared to teach, and did not quiet down over "controversial" issues He expected his followers to be equally daring, but he did not tell them to expect every one who heard them to believe them If the church in any way follows Christ, it must be a teaching church, and must not shrink from teaching the unpopular, the unpleasant, when it is true. The first word spoken to Jesus after the resurrection, so far as our record goes, was the word Rabboni! which means Teacher! One of the last commands he gave his disciples was to go and in their turn make disciples of all nations —that is, make pupils, for "disciple" means "learner," "student."

Teaching Through Centuries

All down the centuries we find the church teaching. Philip teaches a lone rider the meaning of a passage from the Bible; Paul highlights two special matters for Timothy's special concentration: himself—his personal life—and his teaching. Timothy is to entrust the truth to men who will be able to teach still others. When Paul is urging Timothy to follow his (Paul's) example, the first item he mentions in his teaching. When Paul holds up the importance of the Scriptures, the first point he mentions is the usefulness of the Bible in teaching. There was plenty of preaching in Paul's life, but he was not one to let teaching fall out of sight.

So it was in the long history of the church It is true, there were places and times when the teaching duties of the church were forgotten. But as the Roman Empire crumbled and darkness fell across Europe, it was the Christian church which undertook the vast work of teaching the raw and untamed barbarian peoples of the continent. Every monastery was a center that kept the lamp of learning alight. One Bishop of the 8th and 9th centuries—Theodulph of Orleans, was not only the leading poet of his time, but as Bishop he insisted that every one of his priests establish a school and make education open to all Guibert of Nogent, an Abbot who lived at the time of the Crusades, wrote a little book he called "How-to Make a Sermon" but it is plain he had no use for pulpit orators, he wanted sermons from which wide awake listeners could learn Christian truth.

The Courage to Teach

In our time, what with the printing press, radio, TV, prosperity, and photography, the church teaches in many more ways, and more effectively, than could be done in any Christian century before now In Sunday schools, day schools, colleges, conferences, study groups; in newspapers, quarterlies, tracts, magazines, books, film strips, catechisms, plays, in pronouncements of church courts, in textbooks, in popular books, in the findings of great interchurch study conferences such as the one at Oberlin last September; in these as by the week-to-week preaching of the Word all around the world, the church is teaching her members, often what many members do not welcome (as when a southern church speaks out against segregation), what the Word of God means when spoken in today's world

Now Is The Time . . .

By MAX SMITH

County Agricultural Agent

Max Smith

TO ORDER SEEDS — Now is the time to be planning and ordering the farm and garden seeds needed this spring and summer Some varieties of outstanding producers have limited supplies Order early and be sure to get what you want.

TO REPAIR AND SERVICE MACHINERY — Work to be done on tractors or other farm machinery by yourself or your service man could well be started now. You will avoid the spring rush and be more satisfied. Repairs and attention now may avoid costly delays during the rush perods

TO PREPARE STAND-BY POWER UNITS — With the vast use of electricity in our farm business a power failure may cause a major crisis on many farms. Many perishable products are held with the use of electricity, large dairy and poultry operations with the electric labor-saving devices may face critical labor problems in times of power failures. Generators operated with either engine or tractors might be a good investment.

TO PRACTICE PROPER SHEEP MANAGEMENT — Lambing time is the most important time of the year for the shepherd. Close supervision and management of the flock is essential to a profitable lamb crop. The ewe flock should be fed small amounts of a laxative grain ration daily, ample quantities of good legume hay, and be allowed daily outside exercise These practices will largely prevent the "paralysis" condition quite common among sheep producers

45 Answers to Egg-Law Querries

Pennsylvania poultrymen have been asking questions almost continually since it was announced that the Fresh Egg laws were to be revised

Since the new provisions were put into effect Jan. 16, the number of questions has increased.

To help clear up some of the confusion that exists, the state Bureau of Markets and extension workers in agricultural economics department at Penn State have compiled 45 of the most commonly asked questions and their answers

Q What consumer containers must be marked?

A. Only the six-egg and 12-egg carton must be marked

Q. What must be marked on the carton?

A (1) The quality grade, size grade, and the name and address of the producer or packer, or distributor; or

(2) "Not Classified" and the name and address of the producer or packer, or distributor.

Q If I sell eggs in paper bags, must they be marked?

A. Paper bags do not have to be marked

Q. If I do not want to sell by grade and size, how must the carton be marked?

A It must be marked with the name and address of the producer, packer, or distributor, and "Not Classified"

Q May I use the term "Unclassified?"

A No, the correct term is "Not Classified"

Q I sell my cracked and checked eggs in carton, how must they be marked?

A They can be marked "checked" and/or "cracked," or "Not Classified," and the name and address.

Plastic cartons too?

Q If I use plastic cartons, must they be marked?

A As long as it is six-egg or 12-egg carton, it must be marked.

Q How can a plastic carton be marked?

A. An insert in the carton which can be read from the outside and has the required information on it can be used Also a gummed label could be used on some types of plastic cartons

Q May I write the grade and size as well as the name and address on the carton and meet the requirements?

A. The information can be written on the carton as long as it is plain and conspicuous.

Q. May the information be stamped on the carton?

A. It may be stamped or otherwise marked on the carton as long as it is plain and conspicuous.

Q. Must a name and address appear on all packages eggs are sold in?

A A name and address is required only on six-egg and 12 egg cartons.

Q Am I required to have a license to candle and establish a grade on my eggs?

A No license is required.

Q Is a seal needed on the cartons?

A. A seal is not needed

AA quality in B pack?

Q In order to be sure may I mark a carton Grade B and pack AA quality in it?

A. Yes, if you can afford it

(Continued on page 9)

EGG QUALITY BEGINS here, on the farm in the laying house. To market quality eggs they must be gathered at least three times a day in wire baskets, then cooled immediately Remember, there is only one way for egg quality to go after it leaves the hen and that is down.

Babcock's

Healthy Chicks Make Great Layers!

GET YOUR CHICKS OFF TO A GOOD START

Monroe C. Babcock

No matter whose chicks you buy . . . give them the best start you can. You can't be lazy in the chicken business if you are out to make a profit (and I assume you are).

Here are some tips that will help.

Start your chicks in a house that has been scrupulously cleaned, well in advance, disinfected, and allowed to dry out before the litter is put in.

Have enough room. Chicks need 1 sq. ft. floor space per chick for first 8 weeks; and 2 sq. ft. floor space per bird from 8 weeks until they start to comb up (if they are raised inside).

Allow some fresh air, but do not let the chicks get so cold that they pile up or huddle. Cold chicks won't eat and drink properly.

Don't try to crowd too many chicks around one brooder. The average electric, gas or oil brooder will take care of 250 chicks maximum. Maybe some coal brooders will take care of 300 chicks adequately. Chicks usually need some heat for at least 8 weeks.

Chicks need easy access to feed and water for a fast start. They shouldn't have to fight for it. Have at least three 4' hoppers for each 200 birds. Change to "broiler feeders" at 4 weeks and keep raising them on legs to prevent wastage. Never fill over half full. Keep adding feeders as chicks grow.

Remember to always get the best chicks money will buy. Feed and labor are still your biggest expenses in raising chicks.

For 35 years, workers at Mount Hope have stressed BIG EGGS—plus egg quality, heavy lay, and feed conversion—because Egg Size stands near the top in dollars-and-cents values.

Few breeders have achieved this hardest-to-get Balance of Egg Size AND Many of Them.
Big eggs early, and *through the year* are important to income because of big premiums, based on strong demand.
So, why not switch to Mount Hope QUEENS and be sure? Buy from a Franchised Hatchery.

Peas This Year are in Large Supply; Prices are Fire-Sale Low

The pea-pickers overdid it this year. There are so many peas in the USA that grocers are offering them at less than fire-sale prices.

Whether you like your peas canned or frozen, you'll find this the time to stock up.

After laying-in a large supply of peas, you'll need to guard against serving them the same old way, time after time. The "new taste" in foods is as important as the "new look" in clothes. Here are some ideas for adding flavor

1. Saute a shredded onion in butter and use this onion-butter on peas.

2 Saute sliced almonds or Brazil nuts or even bread crumbs and use the same way

3. Season with finely chopped chives or green onions.

4 Peas and rice mix well and look pretty on a plate.

5. Cream, salt and pepper, and if you want, a dash of nutmeg, take peas out of the ordinary.

6. An equal mixture of sour cream and mayonnaise, heated with the peas just before serving, is good too.

7. Fine herbs or chopped fresh mint may add a flavor your family likes.

Try these tricks with other green vegetables too. Any family can become interested in vegetables with added zest.

Don't miss your chance to give your family top-vitamin value — cook peas just until done; use the smallest amount of water possible.

* * *

Speaking of peas, a good way to keep the food budget balanced money-wise to serve a low-cost food occasionally, such as split peas. This vegetable rates as a bargain in price this year and, as always, it is a bargain in food value. Note the price per pound, and then remember that one pound will make from seven to nine servings.

Split pea soup has long been popular when made with a ham bone, but this vegetable also makes an excellent baked dish. Using the following method, it takes only one hour to prepare.

BAKED SPLIT PEAS

To one cup of dry split peas, add one and one-half cups of hot water and one teaspoon of salt, or one and one-half cups of ham broth. Boil 2 minutes, then let soak ½ hour in closely covered pan.

Add one-half to one cup of chopped ham or other meat, bits of cooked bacon, chopped onion or other seasoning Place in baking dish, cover, and bake at 350 degrees (moderate oven) for 25 minutes If overcooked they will become mushy Serves four

* * *

One of our readers, Mrs Harvey K Shoemaker, Florin, Pa sent us some Christmas recipes which arrived too late to be printed for the holidays. So we'll file them away for future use She also included two dessert recipes which you might like to try. The first is for

POLKA DOT PUDDING
Mrs. Harvey K. Shoemaker, Florin

2 cups water
¼ cup pineapple juice
¼ cup maraschino cherry juice
4 tablespoons minute tapioca
⅓ cup of sugar
¼ teaspoon salt
1¼ cups crushed pineapple
10 maraschina cherries cut fine
½ cup walnut meats
1 cup whipped cream

Combine water, fruit juices tapioca, sugar and salt. Bring mixture quickly to a boil, stirring constantly for a few minutes Remove from heat; mixture will be thin Do not overcook Add pineapple and cherries; let stand till completely set or let

Paste This Poem In the Cook Book

I jotted this poem in my cookbook many years ago, says Mrs. Martin S Brandt, R3 Elizabethtown

We may live without poetry, music and art,
We may live without conscience and live without heart,
We may live without friends
We may live without books,
But civilized man cannot live without cooks

He may live without books — What is knowledge but grieving?
He may live without home— What's passion but pining?
But where is the man who can live Without dining?

"YOUR PROFITS START RIGHT HERE"

Jay Greider shows off a box of bouncing Super-cross babies

These little youngsters have high production bred right into them. They are scientifically produced under strict sanitary conditions with the most modern equipment available.

We are hatching out some of the most beautiful chicks we have ever produced, and liveability so far in 1958 has been almost 100%.

If you have never been able to get real high production, try a flock of Greider Super-cross leghorns, grow them healthy, and we really believe you'll be amazed at the results you will get.

A number of our customers have reported that their flocks actually hit peaks of 100% production in 1957.

Soybean Cyst Nematode Found in Six States

A survey of about 750,000 acres in 25 Eastern and Central states shows that the soybean cyst nematode has now spread to 15,626 acres in Arkansas, Kentucky, Mississippi, Missouri, North Carolina and Tennessee.

Fortunately this new pest of soybeans has not yet been found in the chief soybean-producing areas of the U.S. nor in Pennsylvania.

Until research now underway finds a practical chemical, culture or biological control of the pest, scientists advocate strict quarantines in affected areas.

it stand overnight. Then put the nuts in. Whip the cream till thick, cream can be sweetened Then mix everything through each other Serve It is delicious.

Mrs Shoemaker's other recipe is for a berry dressing to be used on Jello, puddings, or cake.

BERRY DRESSING

Mrs. Harvey K. Shoemaker, Florin

1 cup berries
1 cup confectioners' sugar
1 egg white

Beat all at one time till thick. Serve on top of Jello. Berries should be dry, when washed let stand to drain.

Back in a November issue of Lancaster Farming a reader requested a recipe for spiced cantaloupe Mrs. Ed Umble, Gap has sent us hers She says in her letter

I saw the request for spiced cantaloupe There is not much spice in this recipe but I think it is very good.

Select ripe but firm cantaloupes. Peel and cut in serving pieces Pack in jars. For syrup use the following:

1 cup white sugar
2 tablespoons vinegar
1 scant teaspoon salt
Dash or more of ground cloves
Enough water for one jar

Cook syrup for several minutes and pour over cantaloupes Cook 45 minutes Hope you like this recipe

Take it from the teenagers — if it passes their rigid standards this ground beef special is bound to be good. Serve this ground beef special for a light supper or as an after-the-game stand-by.

TEEN AGE SPECIAL

1 pound ground beef
2 tablespoons lard or drippings
¼ cup chopped onion
⅓ cup green pepper strips,
1 can (10½ ounces) condensed mushroom soup
½ cup milk
½ teaspoon salt
4 English muffins, split and toasted
Paprika

Cook onion and green pepper in lard or drippings until tender. Add ground beef and cook until crumbly and brown but not hard. Pour off drippings. Combine soup, milk and salt and add to beef mixture. Cook until heated through, about 5 minutes. Serve on toasted English muffins. Sprinkle with paprika. Makes four servings.

AMONG MANY Lancaster County farmers delivering tobacco last week was J. F. Esbenshade, 2051 Butter Rd, Lancaster, left. Assisting him is Aaron Riehl, R1 Gap. Trucks were lined up at most receiving stations throughout the county for most of the week. (LF Photo)

Fresh pork may be stored in the refrigerator for four or five days if it is wrapped loosely in waxed paper and placed near the freezing unit in the refrigerator.

When you shop for a pattern or a ready-made garment for your youngster, remember that a garment — say a dress or a coat — without a waistline seam is more adaptable to growing children

Here Are the Answers to 45 Most Asked Questions About Egg Law

(Continued from page five

Qualities higher than that marked on the carton are permitted.

Q. If I take a case of eggs to the store and put them in cartons, must the cartons be marked?

A. Yes, the cartons must be marked by the store.

Q. Is the store required to put the producer's name and address on the cartons?

A. The store's name and address should be put on the carton if the store packs the eggs.

Q. If eggs are packed in cartons by the store, who is held responsible for the grade and size?

A. The store would be responsible to see that the cartons are properly marked and that the eggs meet the requirments of the grade and size marked on the cartons.

Whose name on carton?

Q. As a producer I sell eggs to a store and the store packs them in cartons; must my name and address as well as the name and address of the store appear on the carton?

A. No, the only requirment is one name and address.

Q. Will stores have to provide the kind of holding facilities which will maintain quality while the eggs are in their possession?

A. Stores will need to purchase in proper quantities to have a constant supply and rapid turnover. They will also find it desirable to keep the eggs under refrigeration.

Q. Who is responsible for eggs which do not meet the requirements for the grade marked on the carton?

A. Responsibility lies with the person who is offering the eggs for sale.

Who's responsible?

Q. If I deliver eggs to a consumer and she keeps them for a week or two and then decides some of the eggs are not good, am I held responsible?

A. No. It is a good idea, however, to code the carton in order to know when the eggs were candled and packed and get an idea of where quality loss may have occurred.

Q. Some of my customers buy three dozen eggs packed in filler flats wrapped in a newspaper. Must this unit be marked?

A. This unit would not have to be marked.

Q. Is it necessary for me to candle eggs from my own birds when the eggs are sold the same day as Grade A?

A There are no requirements that eggs must be candled, but it is not safe to sell them by any grade without candling them.

New eggs not A?

Q. What new-laid eggs would not qualify as Grade A egg?

A. Those which have blood spots, and which are abnormally shaped, soiled, dirty or checked are not permitted in a Grade A pack. Also eggs which are below Grade A interior quality when laid would have to be removed.

Q. Is there any minimum size for the markings on cartons?

A. There is no minimum size The markings must be plain and conspicuous It is recommended that the letters be no less than a quarter of an inch in height.

Q. Must all required markings be on top of the carton?

A. The markings on a carton may be on the top or on either side. It would not be satisfactory to mark the required information inside the carton, except for transparent plastic cartons.

How about cases?

Q. If I sell a 30-dozen case of eggs to a store, must I mark the case?

A. No, only egg packed in six egg and 12 egg cartons must be marked.

Q. If I mark the size and quality grade on 30-dozen cases even though I am not required to must the eggs meet the minimum requirements?

A. Whenever the size grade and/or quality grade is marked in a case or other package, whether it is required or not, the eggs must meet the minimum requirements for the particular size and quality.

Q. May I reuse cartons with grade and size marked on them as well as with another producer's name on them?

A. The name and address of the other producer on the carton would have to be crossed out and the proper name and address marked on the carton. The eggs in the carton would have to meet the minimum requirements for the quality and size grade marked on the carton. If the eggs do not meet the grade marked on the carton, the old markings would have to be crossed out and new markings used.

What are grades?

Q. What quality grades may I use?

A. The grades which may be used are AA, A, B, C, Checked and/or Cracked. The grade will depend on the quality of the eggs packed.

Q. What are the size grades and the average and minimum weights per dozen?

A. The average weight classes and minimum weights at the rate per dozen are: Jumbo, 30 oz; Extra large, 27 oz.; Large, 24 oz; Medium, 21 oz.; Small and/or Pullets, 18 oz; and Peewee, no minimum.

Q If I weigh a dozen of large eggs and they weigh 26 ounces, am I within the requirements?

A. If more than two eggs in the dozen weigh less than at the rate of 24 ounces a dozen, the dozen would not meet the minimum. Also, if one or more eggs weighed less than at the rate of 23 ounces a dozen, the dozen would not meet the minimum requirements.

What are sizes?

Q. What is the size tolerance a dozen?

A. Ten eggs must be of the size marked on the carton. Not over two eggs may weigh less than an ounce below the minimum weight per dozen. For example, in a carton of large eggs, 10 eggs must weigh at the rate of between 23 and 24 ounces a

(Continued on page ten)

U.S. Importing More Mexican Cattle

During 1957 the U.S. imported about 343,000 head of cattle from Mexico, up 221 per cent from 1956, according to the Foreign Agricultural Service.

The reason given for the sharply increased movement of cattle across the southern border is the heavy demand for stocker and feeder cattle in the Southwestern states.

The total U S. cattle imports in 1957 amounted to 525,000 head, about evenly divided between Mexico and Canada.

Cut Feed Costs!

TRUCK OPERATOR John Weaver, R2 Elizabethtown, left, answers questions being put to him by Robert Boyce, Penn State graduate student Boyce is taking a survey of how cattle are handled from the farm to the market On Monday of last week they were at the Lancaster Stock Yards and Thursday, when this photo was made, they were at New Holland (LF Photo)

Egg Questions

(Continued from page 9)

dozen The average weight of the dozen must be at least 24 ounces No eggs may weigh less than at the rate of 23 ounces a dozen (The weights used for individual eggs are expressed at the rate per dozen)

Q Can 1 pack 28 ounce eggs in a carton marked large?

A Yes, the weight for each size grade is a minimum weight and not maximum

Q Are dirty eggs permitted in cartons marked grade AA, A, B or C?

A No Grade AA, A, and C eggs must be free from adhering dirt.

What other markings?

Q Can other markings, such as white, brown, etc, be marked on the carton?

A. Such markings can be placed on the carton along with the required markings

Q. I have a large proportion of my cartons returned. May I reuse these cartons?

A The cartons can be reused They would have your name and address on. You will need to be careful that the eggs packed in the carton are of the same grade and size as marked on the carton.

Q What is the tolerance for quality?

A Two eggs may be in the quality grade immediately below that marked on the carton.

Q Are blood spots permitted in candled eggs?

A Blood spots are not permitted in Grade AA and A Blood spots less than an eighth of an inch in diameter are permitted in Grade C eggs In Grade B eggs the tolerance of two eggs which could be Grade C in quality may have blood spots which are less than an eighth of an inch in diameter.

Q If I deliver eggs in baskets to the consumer at her home and put them in her container, such as a dish or pan, do I have to do any marking?

A No, only eggs packed and marketed in cartons must be marked.

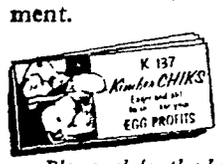
An outstanding characteristic of K-137 KimberCHIKS

As of January 1, 1956, K-137 Kimberchiks led in early egg size in all three official random sample tests in which they were entered—California, Missouri, and Utah. Since large eggs are often worth 100% more than small, and 35-50% more than medium, this characteristic of the K-137 can make a great difference in income during the pullet year.

The K-137 is also noted for its good egg quality, both shell and interior. The high percentage of firm albumen results in more AA quality eggs.

The K-137 has good livability... 93.4% to about 18 months in the three official tests in which they were entered last year.

We invite you to compare the performance of this outstanding stock under your own management.



16 Page Booklet FREE

Please ask for this booklet describing the broad breeding program conducted by Kimber Farms, Inc and giving more information about the K 137.

129TH SPECIAL GUERNSEY SALE

Thursday — February 13, 12:30 Noon

At the Ass'n Sales Pavilion, 6 miles east of Lancaster, Pa, on Route 30

50 HEAD — 2 bulls — 43 cows — and 5 Bred Heifers

(Everything Vaccinated) 30 fresh or due in Jan or Feb T B Bangs Certified

This sale features the beginning of the dispersal of Klarwin Farms, owned by Clarence W Brown, Nottingham, Pa Clarence is consigning 19 head to this sale, all sound animals which have freshened since November or are due soon after sale The balance of this herd will be consigned to other Special Sales as their freshening dates fall due

In the last testing year the Klarwin Herd with an average of 38 94 cows, of which more than half were under 5 years old, produced an average of 8307 Milk and 433,3 Fat

We personally are greatly impressed with the tremendous production capacity of these cows A number of them with records over 500 lbs of fat and the younger ones capable of doing that in the future

Other consignments come from top breeding establishments

1958 FUL-O-PEP CHICK STARTER
grows sound-bodied, sturdy
CHICKS WITH A FUTURE!

GROWS BIRDS FIT . . . NOT FAT

Give your baby chicks the *extra growth power* they need to *grow sound, sturdy* bodies and strong rugged bones. Start 'em on new, nutritious Ful-O-Pep Chick Starter. It grows chicks fit . . . not fat!

98% OR MORE CHICKS LIVE

New vitamin-rich Ful-O-Pep is highly fortified with vital health ingredients to give your chicks more vim and vigor . . . *added life protection,* too. Many poultrymen report over 98% livability, some 100%. What better insurance can you provide for your future layers?

BUILDS AMERICA'S BEST PULLETS

For 15 years in the National Egg Laying Tests—birds grown on Ful-O-Pep Feeds averaged laying *more eggs,* and *bigger eggs,* than birds grown on other feeds . . . official proof that Ful-O-Pep grows America's best laying pullets.

BIRDS LAY FEWER PEEWEES

On the famous Ful-O-Pep Plan, pullets are not forced to lay prematurely . . . are allowed to *develop normally and fully* before they are brought into egg production. As a result, they *lay big, full-sized eggs*—very few, if any peewees.

PRODUCE 18 MORE TOTAL EGGS

Research shows that pullets grown on the famous Ful-O-Pep Restricted Feeding Plan *laid 18 more eggs* than full-sisters grown on forced-feeding plans. Their eggs were bigger, too—averaging almost 1½ ounces more, per dozen!

Ful-O-Pep's Restricted Feeding Plan

SAVES $400 PER 1000 BIRDS

You buy only 2 lbs Chick Starter—5 lbs Ful-O-Pep Growing Mash per bird on range on the Ful-O-Pep Restricted Feeding Plan. This famous plan has been used by leading poultrymen for 20 years. You save up to 8 lbs total feed per bird, over forced-feeding plans, or about *40¢ per bird!*

Simplified plan makes feeding easy

You feed only 5 lbs of Ful-O-Pep Growing Mash per 100 birds—5 days a week Feed oats every day It's that simple! Ask your Ful-O-Pep Dealer about this *easy-to-follow plan*—so you, too, can grow big, profitable pullets . . . and *save about 40¢ per bird!*

SAVE MONEY!

See your Ful-O-Pep Man
